Immediate Position – Dallas Research Center

Position: Research Associate in Turfgrass Management

Highlights of job responsibilities and requirements:

- A Research Scientist position in turfgrass management is available immediately at Texas AgriLife Research and Extension Center located in Dallas, TX, in support of the turfgrass breeding and genetics program.
- The incumbent will have knowledge and demonstrated experience with data collection using NTEP’s (National Turfgrass Evaluation Program) rating system as well as digital imaging analysis.
- The incumbent will provide experienced assistance and coordination in the design and conduct of the experiment, statistically analyze data, and summarize and prepare results for publication.
- The incumbent is required to have good conceptual knowledge in turfgrass management as well as practical expertise in basic turfgrass cultural practices including mowing, irrigation, fertilization, and weed/insect/disease control.
- The incumbent will be expected to train personnel in research techniques and use of equipment; monitor, maintain and repair research equipment, procure and maintain adequate stock of supplies; and perform other duties as required.
- Excellent organizational skills and ability to work effectively on research teams are essential.

Education: M.S. degree in turfgrass science, horticulture or relevant field, or B.S. degree in relevant field and two years of related professional experience.

Experience: Experience with organizing and conducting scientific research, technical writing, statistical analysis and project coordination.

Interested parties should submit (1) their curriculum vitae, (2) a statement of research interests and (3) a minimum of three references at http://greatjobs.tamu.edu.
