This position is part of an EPA-funded project, AgriBenchmark, that aims to produce national benchmarks for the agricultural sector in the area of farm nutrient management and explore ways to put such benchmarks into operation at farm level to motivate improvements in farm efficiency and sustainability.

This is a research focused role, where you will conduct a specified programme of research supported by research training and development under the supervision and direction of a Principal Investigator.

The primary purpose of the role is to further develop your research skills and competences, including the processes of publication in peer-reviewed academic publications, the development of funding proposals, the mentorship of graduate students along with the opportunity to develop your skills in research led teaching.

In addition to the Principal Duties and Responsibilities listed below, the successful candidate will also carry out the following duties specific to this project:

- literature review and synthesis
- data processing, quality control, analysis and modelling.

Salary: €33,975 - €41,181 per annum
Appointment on the above range will be dependent on qualifications and experience

Prior to application, further information (including application procedure) should be obtained from the UCD Vacancy website: [http://www.ucd.ie/hr/jobvacancies](http://www.ucd.ie/hr/jobvacancies)

Applications must be submitted by the closing date and time specified. Any applications which are still in progress at the closing time of 17.00 pm on the specified closing date will be cancelled automatically by the system. UCD are unable to accept late applications.

UCD is an equal opportunities employer
